PFP (RLE)
THE COMPACT LIGHTWEIGHT
THE ULTRA COMPACT (EC) PLUG FAN WITH BACKWARD CURVED BLADES (PFP) Completes THE NICOTRA GEBHARDT LINE OF FANS.

Beyond the existing plug fan range with backward curved hollow profile blades (RLE), Regal has developed an additional range of permanent magnet external-rotor motor (EC) plug fans.

The PFP, with outstanding combination of efficient drive system and aerodynamics, is the ideal solution for medium-pressure applications. The PFP range completes the offer of existing low pressure and high pressure high efficiency fan ranges RLM, RLE and RQM.

There now is a perfect solution from the Nicotra Gebhardt product range for any fan application.

THE NEW IMPELLER IS SPECIFICALLY SELECTED FOR OPTIMUM PERFORMANCE IN THE PFP APPLICATION:

- Lightweight high-efficiency aluminium impeller.
- Optimised for medium pressure applications.
- Reduced losses due to motor influence.
- Low interference loss with fan enclosure.

THE COMPACT LIGHTWEIGHT

PFP RANGE - PLANNED EXPANSION OF THE PERFORMANCE ENVELOPE
THE NEW MOTOR COMBINES A NUMBER OF OUTSTANDING FEATURES:

- Compact external-rotor motor.
- Aerodynamically optimised.
- High-efficiency motor with rare-earth magnets.
- Integrated controller.

ALSO AVAILABLE RLE EVO

- External rotor motor (EC)
- Controlled with integrated electronics
- Impeller sizes 250 - 630 mm
- Max. motor input 3.5 kW

THE NEW ADVANCED CONTROLLER CHARACTERISTICS:

- All single-phase models comply with EMC emission requirements for EN 61800-3 class C1; three-phase models comply with the emission requirements for class C2; both types comply with immunity requirements for class C3.
- Can operate in PID mode, adjusting fan speed to keep the measurement of a system parameter to the desired value, via 2 analogue inputs, and an external transducer.
- Operation at constant flow-rate can be achieved using the PID mode and a pressure transducer, connected with the pressure probe provided on the inlet nozzle.
- Speed control via external voltage signal.
- ModBus / RS485 serial interface.
- 10V and 24V power supply for external transducers.
- Master & slave mode, for stable operation in parallel.

APPLICATION CONSIDERATIONS

The proper selection and application of power transmission products and components, including the related area of product safety, is the responsibility of the customer. Operating and performance requirements and potential associated issues will vary appreciably depending upon the use and application of such products and components. The scope of the technical and application information included in this publication is necessarily limited. Unusual operating environments and conditions, lubrication requirements, loading supports, and other factors can materially affect the application and operating results of the products and components and the customer should carefully review its requirements. Any technical advice or review furnished by Regal Beloit America, Inc. and/or its affiliates ("Regal") with respect to the use of products and components is given in good faith and without charge, and Regal assumes no obligation or liability for the advice given, or results obtained, all such advice and review being given and accepted at customer’s risk.

For a copy of our Standard Terms and Conditions of Sale, please visit http://www.regalbeloit.com (please see link at bottom of page to “Standard Terms and Conditions of Sale”). These terms and conditions of sale, disclaimers and limitations of liability apply to any person who may buy, acquire or use a Regal product referred to herein, including any person who buys from a licensed distributor of these branded products.
